

**Patrick Lillis, DDS**

AGD SUBJECT CODE: 690 – IMPLANTS
Lecture up to 5 hours

Dr Lillis receives product and/or financial support
from Straumann, & Benco

FULL-ARCH EXCELLENCE: PREDICTABLE WORKFLOWS IN MODERN IMPLANT & RESTORATIVE DENTISTRY**COURSE SUMMARY AND OBJECTIVES:**

Full-arch implant rehabilitation has become an increasingly predictable and transformative solution for patients, but success requires a comprehensive, well-coordinated approach. This course provides a step-by-step framework for diagnosing, planning, and restoring full-arch cases using modern digital workflows and restorative-driven treatment planning.

Participants will explore key components of full-arch treatment, including case selection, digital planning, provisionalization, occlusion, final prosthetic design, and complication management. Emphasis is placed on integrating technology, improving communication with surgical and laboratory teams, and developing predictable systems for long-term success.

By the end of this program, clinicians will gain the knowledge and confidence to approach full-arch cases with greater clarity, efficiency, and consistency.

Upon completion of this session, attendees should be able to:

- Identify and develop appropriate full-arch treatment plans using restorative-driven principles and digital technologies, including CBCT, intraoral scanning, and digital smile design
- Implement comprehensive workflows for full-arch rehabilitation, including provisionalization, occlusion, biomechanics, and definitive prosthetic design
- Evaluate and manage clinical outcomes by selecting appropriate materials, addressing complications, and establishing long-term maintenance protocols

Dr Patrick Lillis earned his Bachelor of Science in Biomedical Science from Marquette University and his Doctor of Dental Surgery degree from Creighton University School of Dentistry. He then completed a two-year Advanced Education in General Dentistry residency at the University of Missouri–Kansas City, with a strong focus on implants, cosmetic dentistry, and complex restorative care.

His advanced training provided the opportunity to treat highly complex cases and collaborate with leading experts in implant and cosmetic dentistry. Dr Lillis remains actively engaged with a national network of dentists to stay at the forefront of emerging technologies and techniques. In addition to leading a full-time private practice, Dr Lillis is a keynote speaker for several dental manufacturers and frequently lectures nationwide on dental implants and full-mouth rehabilitation. Outside of dentistry, he enjoys spending time with his wife and two children, as well as running, skiing, and golf.
